Mines and Mining Stocks

CACTUS MINE LOOKING FINE

Samuel Newhouse and Mana-Ger Hanchett Tell What Is Doing Underground.

While no effort is being made to exploit conditions at the property and the management is crowding development with the evident purpose only of getting results, an appeal to President Samuel Newhouse and General Manager Lafayette Hanchett, on the return of the latter from the Cactus yesterday morning for a state-

ment was not altogether fruitless.
"I have not talked with Mr. Hanchett since his arrival," said Mr. Newhouse,
"but the reports from Superintendent Drummona indicate that the mine is in splendid condition. In what is designated at the mine as the 'black stope,' Mr. Drummond reports that they are now breaking down ore that is running 3 per cent copper and from \$3 to \$4 in gold per ton. This stope is on the 600 or main tunnel level and the disclosures there being made are control as most valuable and made are counted as most valuable and significant. On the 400 level a body of 25 per cent copper ore was encountered some time ago and I am informed that the developments there are also most assuring. In fact, the mine as a whole is constantly emphasizing the fact that, great as it is, we know comparatively little as yet about its limitations."

Manager Hanchett was later found in his office and in answer to a query as to how things were looking in the bottom he how things were looking in the bottom he stated that the shaft was not sunk in the ore at the lower levels. On the 900 the crosscut has not yet reached the ore, but the appearance of the face of the dust when Mr. Hanchett left the camp was such that he declared he would not

COPPER STOCKS IN **BOSTON AND NEW YORK**

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this de-partment of The Herald.

Boston, Aug. 8.—Rumor of a big failure in the flour business gave the bears a chance to sell a few stocks today and after a very strong opening the close was comparatively weak. The North Lake proposition is about to be floated, consisting of 100,000 shares at \$8. Some 55,000 will go to purchase the land and the Il go to purchase the land and the lance will be offered to the public at \$8.

be surprised to get word at any minute that ore had been encountered. He con-firmed all that Mr. Newhouse said about firmed all that Mr. Newhouse said about conditions above and added that a steady output was being maintained as development work progressed. During July, he said, 19,000 tons of ore was treated in the mill, while the table capacity of the plant was added to. It has been found that the ores on the lower levels, or a good percentage of them, yield better returns through finer grinding. That has necessitated the installation of more tables and

MINING AND BROKERAGE

The Intermountain Securities company The Intermountain Securities company was organized in this city yesterday as a successor to the mines and brokerage business of R. J. Evans. R. J. Evans is president and H. H. Dorsey secretary, the remaining director and balance of the company being Colonel George W. E. Dorsey, who was prominent in retary, the remaining director and balance of the company being Colonel George W. E. Dorsey, who was prominent in mining circles here a few years ago, previous to his locating with his brother in Goldfield, Nev., where they were and are doing business as the Dorsey Investment company. The headquarters of this company will now be moved to this city. It is the purpose of the new company to do a general mining and brokerage business, and Mr. Evans states that the latter will be carried through on a commission basis only. The combination is a strong one and the friends of Colonel Dorsey will be glad to know that he and his brother have decided that Salt Lake is the only real, live mining center in the west, the only place in which to establish headquarters and do business.

The remaining director and balance in thal salts and brokerage business where and are doing business as the Dorsey Investment of this city.

Ore and Bullion.

Ore and builion settlements in this yesterday, as reported by McCornic Co., amounted to \$45,000, as follows: ver, lead, gold and copper ores, \$10 base builion, \$35,000. Settlements for week amounted to \$375,000.

Metal Market.

Silver, 52½c per ounce.

thing oncerning conditions in the Juab field that Manager Dunn and the company have not always been willing to disclose, believing that, if the field proves up, there is room for everybody that cares to get in and drill.

The log on the Lucas well gives the readings at intervals all the way down. Mr. McPherson's report on both properties was a comprehensive and convincing one and to read it leaves the impression that results must surely follow development work. Attention is going to be given particularly, on the start, to the property held under bond. A fifty-foot tunnel is to be extended 200 feet or such a matter to get under ore bodies wind at the surface in early days and mined at the surface in early days and, this accomplished, it is considered cer-tain that the syndicate will have a shipping proposition of its own.

Owens lake, on the California side of the line, is only about thirty-five or forty miles below these properties and, as a new smelter is now building at that point, it is going to be only a short time until these districts have smelting facilities practically at their gates, with railroad

SEVEN TROUGHS ORES MAY ALL BE MILLED

tending down to the smelter.

It is quite evident that the days of shipping high grade gold ores to the smelters from Seven Troughs is about at an end. During July the Kindergar-ten company made test runs on the different grades of ore and, by the end of the month, according to reports from camp, real "picture rock" was being put through with such perfect results as re-lated to the recovery of values that the management at once determined that no ore, no matter how rich, should be shipped to the smelters and subjected to the confiscatory freight and melting charges.
So thoroughly has the Kindergarten mill

So thoroughly has the Kindergarten mill démonstrated its ability to recover the values from high grade rock that the owners of the Wihuja lease on Therein ground have just decided to abandon the intention of shipping thirty tons of sensational ore and instead will have it run through the Kindergarten mill. By so doing a product weighing but a small through the Kindergarten mill. By so doing a product weighing but a small fraction of the crude ore can be obtained and shipped by express and sold practically at bullion rates.

It looks as though about the only thing needed to make "life worth living" in the Seven Troughs district, now that good mills have been erected, is the installation of retorts in which to reduce to bullion the highly concentrated products of the ores of that region. With such a convenience probably more than one-half of the production of the district could be sent out in the form of gold-silver bars.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Only a few of the unlisted stocks were mentioned yesterday, and business was done in all, with the exception of one, Wheeler Gold, which was offered at 44c Bingham Central Standard sold at 38c Bingham Central Standard sold at 38c, Mason Valley at \$1.82½, Ohio Copper at \$3.90 and \$4. Silver King Coalition at \$4 and \$4.05, Uintah Treasure Hill at 17c to 20c and Western Nevada Copper at 40c. From the appearance of things during the past few days, every one of these stocks are going to be more active and they will likely sell considerably higher.

A dozen Salt Lake mining men have At the Iowa Copper company's property ground adjoining the property recently contact at a distance from its portal of secured by J. P. Turner, about six miles from Basalt, on the Nevada-California came down from camp Friday night, railroad, and also a group of four claims states that drifting in the direction of is today very near the highest of the

"Copper is bound to advance from 1314 cents, and it was bound to fall from 25 cents; one is just as inevitable as the 162 So. West To "There were those who a little more

than a year ago boasted that they were doing such a vast volume of business at such extraordinarily high prices and were such extraordinarily high prices and were sold so far ahead that no calamity could overtake them. It was not long, however, before those air castles were in ruins, and tight money did the trick.

"Today money is superabundant and the copper metal at 13 cents is better collateral with the banks than was copper at 25 cents. This of course means much to the selling companies. We are back to first principles now and we are willing to throw away our stilts and get

back to first principles now and we are willing to throw away our stilts and get down to Mother Earth.

"Few people realize the distribution which has taken place in copper shares during the past twelve months and the effect of this distribution on prices for copper stocks. Almost every banking house in Boston will tell you that it has

AUTHORITY ON TIME TO

BUY AND SELL COPPERS

"What's the use of taking out pencil and paper and trying to reach some mathematical conclusion as to wether or not 14¼-cent copper does or does not warrant the present quotations for copper shares? The time to buy them is when the metal is 13 cents and the time to sell them is when the metal is 25 cents," says the president of a Lake Superior copper company, according to the Boston News Bureau.

"Copper is bound to advance from 121/2"

Hings in Switzerland now."

Ernest R. Wooley returned from the Lost River region, Idaho, yesterday morning and just to show that there was game and fish in that region, he brought down a basket of fine trout and a sack full of prairie chicken. He stated that work was progressing splendidly at the property of the Alta Copper company, with which he is identified, and which he went up particularly to see. The tunnel has been extended forty-five feet since work was started last month, and every foot has been in ore the quantity and quality of which is improving with every blast.

THE PRESIDENT HAS SIGNED

Our application for the segregation of 43,000 acres of land under the CAREY ACT in the PAHVANT VALLEY, Millard County, Utah, 140 miles south of Salt Lake City on the "Salt Lake Route," and the STATE BOARD OF LAND COMMISSIONERS has entered into a contract with our company for the sale of these lands. This is a part of the largest tract of arable land in Utah. It is supplied with water from the largest reservoir in the state (Sevier Bridge), which is a part of the greatest irrigation system in Utah. These lands are a deep, rich alluvial soil, formed by an exhaustless delta deposit.

They are unsurpassed for sugar beets, alfalfa, corn, pumpkins, wheat, oats, barley, fruit and vegetables. Onions, asparagus, cabbage, tomatoes grow to perfection, and yield from \$100 to \$500 per acre.

No better markets in the entire west in supplying nearby mining districts, mills and smelters. Here is a great opportunity to secure land on the ten annual payment plan with perpetual water right and ultimate ownership by the
